PROFESSIONAL SUMMARY

Entry-Level Full-Stack Developer with hands-on experience building web applications using React.js, Django, and Django Rest Framework. Completed an internship developing a real-time polling platform with REST APIs and JWT authentication. Skilled in frontend/backend integration, reusable component development, and responsive UI design. Passionate about scalable web applications and problem-solving.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++

Frontend: HTML5, CSS3, React.js, Tailwind CSS, Material UI

Backend: Python, Django, Django Rest Framework (DRF)

Databases: PostgreSQL, SQLite

Authentication: JWT (JSON Web Tokens)

Tools & Platforms: Git, GitHub, Postman, Vercel, Render, VS Code

EXPERIENCE

Web Developer Intern

Code Lab Innovation (CLI)

- Worked as a Full-Stack Developer Intern on a **real-time polling application**.
- Developed 10+ RESTful API endpoints for polls, voting, and authentication using **Django Rest Framework (DRF)** for handling polls, votes, and user interactions.
- Implemented **JWT-based authentication** to secure user access and API endpoints.
- Integrated backend APIs with **React.js** frontend components.
- Improved API reliability through input validation and structured error handling.

EDUCATION

Virtual University of Pakistan

Lahore, Punjab

Bachelor of Science in Computer Science (**Undergraduate**) | CGPA: **3.32/4.0**

Sep 2023 – Expected 2027

PROJECTS

Real Time Polling App | React.js, Django, Django Rest Framework, JSON Web Token **Sep 2025 – Nov 2025**

- Built RESTful APIs for creating polls, submitting votes, and viewing live results.
- Implemented **JWT-based authentication** to secure users and voting endpoints.
- Designed efficient database models using SQLite for polls and responses.

Google Keep Inspired Notes Application | React.js, Django, Django Rest Framework (DRF), Python,

Tailwind CSS.

Mar 2025

- Built a full-stack notes application inspired by Google Keep.
- Developed complete **CRUD functionality** for notes.
- Designed a responsive and modern UI using Tailwind CSS.
- Ensured data persistence and efficient queries with SQLite.

Task Management Web Application | React.js, Django, (DRF), (JWT), Python, Tailwind CSS **Jun 2025**

- Developed a task management web application with secure authentication and CRUD functionality using REST APIs.
- Implemented user authentication and protected routes using JWT.
- Built API endpoints for task creation, updating, deletion, and completion tracking.
