| <ul style="list-style-type: none">• HTML• CSS• React.js• PostgreSQL | <ul style="list-style-type: none">• Django• Django Rest Framework• Material UI• Tailwind css |
|--|---|

Web Developer

- Designed frontend elements using Tailwind CSS.
- Improved error handling throughout the web application and upgraded CRUD functionality for website content.
- Complete detailed programming and development tasks for front end public and internal websites as well as challenging back-end server code.

Projects

Full Stack Todo App

In this project, I will apply all the knowledge I have learned in my web development course.

This is a simple project to understand how a full-stack application works and how to create a RESTful API.

Understand Json web token for authentication
