PROFESSIONAL SUMMARY

Entry-level Software Engineer with strong programming and OOP fundamentals, and hands-on full-stack experience building web applications with React.js, Django, and Django Rest Framework. Completed an internship developing 10+ REST API endpoints with JWT authentication for a real-time polling platform. Comfortable working with APIs, JSON, relational databases, and Git-based workflows. Regularly uses AI development tools such as Claude and ChatGPT to accelerate debugging, testing, research, and documentation — while carefully reviewing and validating AI-generated code rather than relying on it blindly. Fast learner, quality-focused, and eager to take ownership of assigned tasks.

TECHNICAL SKILLS

Languages & Fundamentals: Python, JavaScript, C++, Object-Oriented Programming (OOP)

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Material UI

Backend & APIs: Django, Django Rest Framework (DRF), REST APIs, JSON

Databases: PostgreSQL, SQLite

Authentication: JWT (JSON Web Tokens)

AI Development Tools: Claude, ChatGPT — used daily for debugging, code review, testing, research & documentation

Tools & Platforms: Git, GitHub, Postman, Vercel, Render, VS Code

EXPERIENCE

Web Developer Intern

Code Lab Innovation (CLI)

- Developed, tested, and debugged a real-time polling application as a Full-Stack Developer Intern.
- Built 10+ RESTful API endpoints for polls, voting, and authentication using Django Rest Framework (DRF).
- Implemented JWT-based authentication to secure user access and API endpoints.
- Integrated backend APIs with React.js frontend components, troubleshooting issues across the stack.
- Improved API reliability through input validation, structured error handling, and manual testing.
- Used AI tools (Claude, ChatGPT) to speed up debugging and research, while independently reviewing all generated code before use.

EDUCATION

Virtual University of Pakistan

Lahore, Punjab

Bachelor of Science in Computer Science (Undergraduate) | CGPA: 3.32/4.0 | Sep 2023 – Expected 2027

PROJECTS

Real-Time Polling App | *React.js, Django, Django Rest Framework, JWT* Sep 2025 – Nov 2025

- Built RESTful APIs for creating polls, submitting votes, and viewing live results.
- Implemented JWT-based authentication to secure users and voting endpoints.
- Designed efficient database models using SQLite for polls and responses.

[GitHub: https://github.com/hamzaraftar/Full_Stack_Poll_Project](https://github.com/hamzaraftar/Full_Stack_Poll_Project)

Google Keep-Inspired Notes Application | *React.js, Django REST Framework, Python, Tailwind CSS* Mar 2025

- Built a full-stack notes application with complete CRUD functionality.
- Designed a responsive, modern UI using Tailwind CSS and reusable React components.
- Ensured data persistence and efficient queries with SQLite.

[GitHub: https://github.com/hamzaraftar/Notes-App](https://github.com/hamzaraftar/Notes-App)

Task Management Web Application | *React.js, Django REST Framework, JWT, Tailwind CSS* Jun 2025

- Developed a task management app with secure authentication and full CRUD functionality via REST APIs.
- Implemented user authentication and protected routes using JWT.
- Built API endpoints for task creation, updates, deletion, and completion tracking.
